

MODULE ULTRASOUND INSPECTION CENTER

FUNCTIONS Inspects for internal defects in filter substrates

- FEATURES**
- High resolution phased array scanning
 - High-speed, fully automatic, 100% scan
 - Rotary or pass-through part handling
 - Auto and Manual operational modes available
 - Repeatable, accurate defect detection
 - CATPRO software and controls
 - Bare substrate or in-can configurations available
 - Defects as small as 0.25" detected
 - Unmatched worldwide product support via AIM™

OPTIONS Safety equipment package (shown)

***Requires proper tooling.*

1 Part loading interface supports both human and robot operation.

2 Optional safety equipment package keeps operators safe. Safety equipment includes: safety cage, light curtains, beam breaks, and safety interlocks.

3 Locked service doors prevent unauthorized access to critical components.
